

ROY

logo

Meaning of Roy logo

Roy Logo was designed by Seo Ju-young and produced by Seo Joo-wan, a designer. The Roy Logo has two chains connected together to form an R. This means the blockchain. And the two colors - blue and red - represent Republic of Korea and at the same time represent the union.

Purpose of White Paper

The purpose of the White Paper is to see Roy's identity and vision for what purpose he was made. I hope to get the message across to the readers of this white paper.

What is Roy?

Total supply: 700,000,000

Blockchain used: AltHash blockchain

Main use: payments and transfers at home and abroad

Supply: Supply proportional to demand (why: prevent inflation)

Demand: Two main routes of demand, outside the exchange (shopping malls, music, psychological counseling) and exchanges

(The focus is on creating sustainable and stable demand outside the exchange, rather than on the exchange.)

Price: outside the exchange 1 Roy is \$0.01

in the exchange 1Roy is Decision based on the capitalist market economy(Hope price: \$0.1+).

Why are the prices different from those on the exchange: the value of \$10 outside the exchange is the minimum value of Roy, a price defense against possible Dumping on the exchange.

Roy's philosophy: Avoid pumping and dumping, and aim for gradual and stable price increases.

Goal: \$1

Practical Use

Roy is a token that built on the AltHash blockchain. Roy starts with the token used in the shopping mall and will extends to the use of music lessons and psychological counseling. The reason for this is to reduce the speculative nature used only in the exchange and to create sustainable and stable demand outside the exchange as well as in real life.

Although a corporation issues stocks and investors buy and sell stocks on the stock exchange, a corporation still earn a lot of money in life. When this happens, the value of stocks is more stable and higher. If a corporation were to be used only on the stock exchange, it would be more speculative and there would be many side effects such as inflation that are often seen in the cryptographic currency market today.

The cryptographic market should no longer remain only on the exchange. It should be a realistic vision, not unrealistic white paper or road map. Tokens, in particular, will evolve like the APP market today only if they focus on actual use as the APP market has evolved today.

For this reason, Roy is more focused on actual use beyond the exchange. From an investor's point of view of investing in Roy, we will be able to trust and invest more when we have a variety of demand channels other than the exchange.

ROADMAP

Phase 1 starts with a shopping mall token. The shopping mall is used in partnership and partnership with Internet shopping malls such as Korea's Seoul, which is about 15 years old, and Dingry.com, which sells guitars and musical instruments.

Step 2 is using a Roy token in the music field. Sharing your own songs and getting to rewards, or using Roy Token as a lesson fee for music lessons.

Step 3 uses a Roy token for psychological counseling. The use of cryptographic notes in areas where confidentiality is important is an attractive way to pay. Rather than offline counseling, will use Roy for media counseling, cyber counseling, and chat counseling.

[Short-Term Objectives]

Step 1.

Use will Roy tokens at online shopping mall

BINUPIA (pilot project)

BINUPIA is an Internet shopping mall that has been selling natural soap in Korea for about 15 years.

In a market where many Internet shopping malls are created and disappearing, BINUPIA continues its tradition of natural soap.

BINUPIA and Roy Token, which are trusted by customers using only 100% natural materials from the base, have formed a partnership.

Partnership

21-May 2018

The screenshot shows the Binupia website interface. At the top, there are navigation tabs: ABOUT BINUPIA, HOW TO, BEAUTY, REVIEW, COMMUNITY, and CS CENTER. A central banner for 'SUMMER EVENT!!' promotes a '천연비누 하나 더!!' (One more natural soap!!) offer. The offer details are: *5만원 이상 구매시 천연비누 하나 더!! (When purchasing over 50,000 KRW, get one more natural soap!!) and *사용후기 고객님께 더블 포인트 적립!! (Double points for customers who leave reviews!!). Below the banner, there are icons for '올바른 세안법' (Correct washing method), '천연력방법' (Natural method), '제품 고르기' (Choosing products), and '피부미인 생활습관' (Skin beauty lifestyle habits). A '제/품/리/스/트' (Product List) section follows, showing eight different soap products with their prices and descriptions:

- 마법의밤껍질 : 12,500원 (Magic Night Peel)
- 생생~당근비누 : 13,500원 (Fresh Carrot Soap)
- 브로콜리세탁비누 : 6,000원 (Broccoli Laundry Soap)
- 한방보안비누 : 13,500원 (Herbal Security Soap)
- 그린 클레이 : 12,500원 (Green Clay Soap)
- 아보카도 비누 : 14,000원 (Avocado Soap)
- 산양유 비누 : 13,500원 (Goat Milk Soap)
- 여성초와감초 : 15,000원 (Women's Health and Licorice Soap)

At present, you can buy natural soap with a Roy token (1 ROY=10 won) at BINUPIA in Korea.

And we're looking at ways to make payments easier and easier with Roy Token.

[Mid-term Target]

Step 3.

Create a system in which unknown amateur CCM composers share songs and earn rewards with Roy.

Step 4.

Listed on at least one middle exchange at home and abroad [listed price : KRW 500(approximately. \$ 0.5)]

[Long-term goal]

Step 5.

Using Roy Tokens in a field of psychological counseling where secrecy is essential. Today, counseling is too expensive. Roy Tokens offer low-cost, offline psychological counseling. In particular, will pay for online media counseling

and creates a system for anyone to consult. For example, it can be used for phone counseling or chat counseling.

《Secret project. Bot Psychological Counselor》

Step 6.

Listed on at least one large exchange [listed price : 1000 won (approx. 1 dollar)]

Step 7.

Building a Roy Platform Using Roy Tokens in BINUPIA, CCM Sharing, and Psychological Counselling

I think these three areas are a good place to apply the blockchain, the technology of the coming fourth industrial revolution. I've worked in this field for the last 10 years. Therefore, the Roy project is competitive and confident that it will succeed. thank you
